

How to reply privately ✨ using WhatsApp

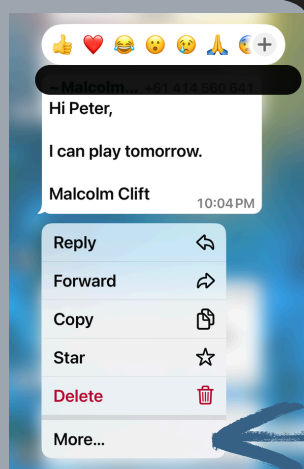

Receive a message in Group

Someone has asked for a game and you can play. Instead of sending a message to the entire group. Please reply privately, so only the person who sent the message receives it.

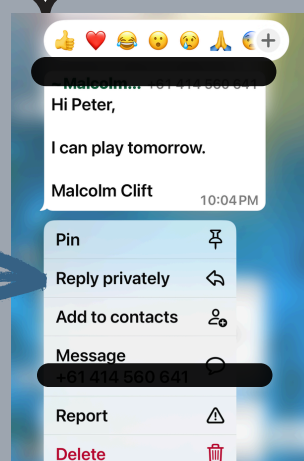

Reply Privately

Hold your finger on the message to get an options box. Instead of using Reply -select More... to receive further options

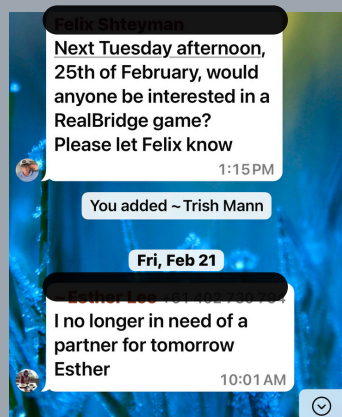

Click Reply Privately

Click the Reply Privately option and the message you type will only go to that person. Note that when replying privately the persons name will not show unless they are in your contacts.

When successful

When you are no longer looking for a game, please type a short message on the Group Chat, saying that you are no longer looking.

Saves a lot of pinging!

Doing this means that everyone in the group will only be alerted twice, instead of 10 times whilst you sort out systems and venues.

Thank you
